

# More ways to keep our STUDENTS SAFE

Sacred Heart Primary School is constantly updating the ways that we protect our students and we wanted to inform you of some exciting new initiatives we are implementing this term.

## INFORMING PARENTS

As part of our newsletter we will be including a one page Parent Advice resource that focusses on technology issues that concern parents and apps used by young people. It provides information on the use of the apps and the associated risks, together with practical information for parents on how to best support and protect their families from technological risks.

parents are encouraged to use the information to begin conversations with their children

## PROTECTING STUDENTS

We are also placing an anonymous online reporting program, called SafeGuard, on Google classrooms.

SafeGuard can be accessed by students to provide the school with information on issues that they personally face or to help support their peers with personal concerns. The anonymous nature of the platform allows students to securely provide information to the school to help ensure our school community is a safe and supportive one.
